

2023 Edelman Trust Barometer

Informe España

2023 Edelman Trust Barometer

Metodología

Encuesta online anual 2023

Estudio realizado del 1 al 28 de noviembre de 2022

28

Países

32,000+

Encuestados

1,150+/-

Encuestados por país

Argentina	Colombia	Irlanda	México	Corea del Sur	Emiratos Árabes
Australia	Francia	Italia	Nigeria	España 	Reino Unido
Brasil	Alemania	Japón	Arabia Saudí	*Suecia	EE.UU
Canadá	India	Kenia	Singapur	Tailandia	
China	Indonesia	Malasia	Sudáfrica	Países Bajos	

Rusia, parte del Edelman Trust Barometer desde 2007 a 2022, no ha sido incluido en este estudio

El tamaño de la muestra varía por país desde 1.082 hasta 1.500.

Margen de error global en 27 países: población general +/- 0.6 puntos porcentuales (n=31, 171)

Margen de error específico por país: población general +/- 2.5 a 3.0 puntos porcentuales (varía por país según el tamaño de la muestra n=1.082 a n=1.500)

Promedios globales

Pueden variar en función del número de países encuestados cada año:

GLOBAL 27

Para proteger la estabilidad de la media global, Suecia no será incluida en la media hasta que haya al menos dos años de datos recientes

GLOBAL 25 Excluidas China y Tailandia

Cuando la sensibilidad de la pregunta impide obtener datos de estos países en concreto

Relevancia estadística

 **Cambio significativo**

Todos los cambios significativos interanuales se determinaron mediante una prueba T con un nivel de confianza superior al 99%

Para más detalles sobre la media global y la metodología específica empleada, por favor, consulte el Apéndice Técnico

23 años del Trust

Las fuentes de desconfianza que están influyendo en la polarización

Ansiedad económica

El optimismo económico internacional se desploma, con 24 de 28 países registrando mínimos históricos en el número de personas que creen que sus familias estarán mejor en cinco años.

Desequilibrio institucional

Una brecha de confianza creciente y enquistada entre las instituciones sitúa a las empresas bajo la presión de rellenar el vacío de liderazgo dejado por los gobiernos.

División de clases

Aquellos en el cuartil superior de ingresos viven en una realidad de confianza diferente a los que se encuentran en el cuartil de ingresos inferiores.

La batalla por la verdad

Vivimos en burbujas informativas que dificultan el encuentro entre visiones distintas, y no sabemos en qué fuente de información confiar: desconfiamos de los medios de comunicación, y especialmente de las redes sociales.

Afrontando la ansiedad económica sin una red de confianza

El optimismo económico se desploma

▼ 24 de 28 países en mínimos históricos

■ Países desarrollados

Mi familia y yo estaremos mejor en cinco años

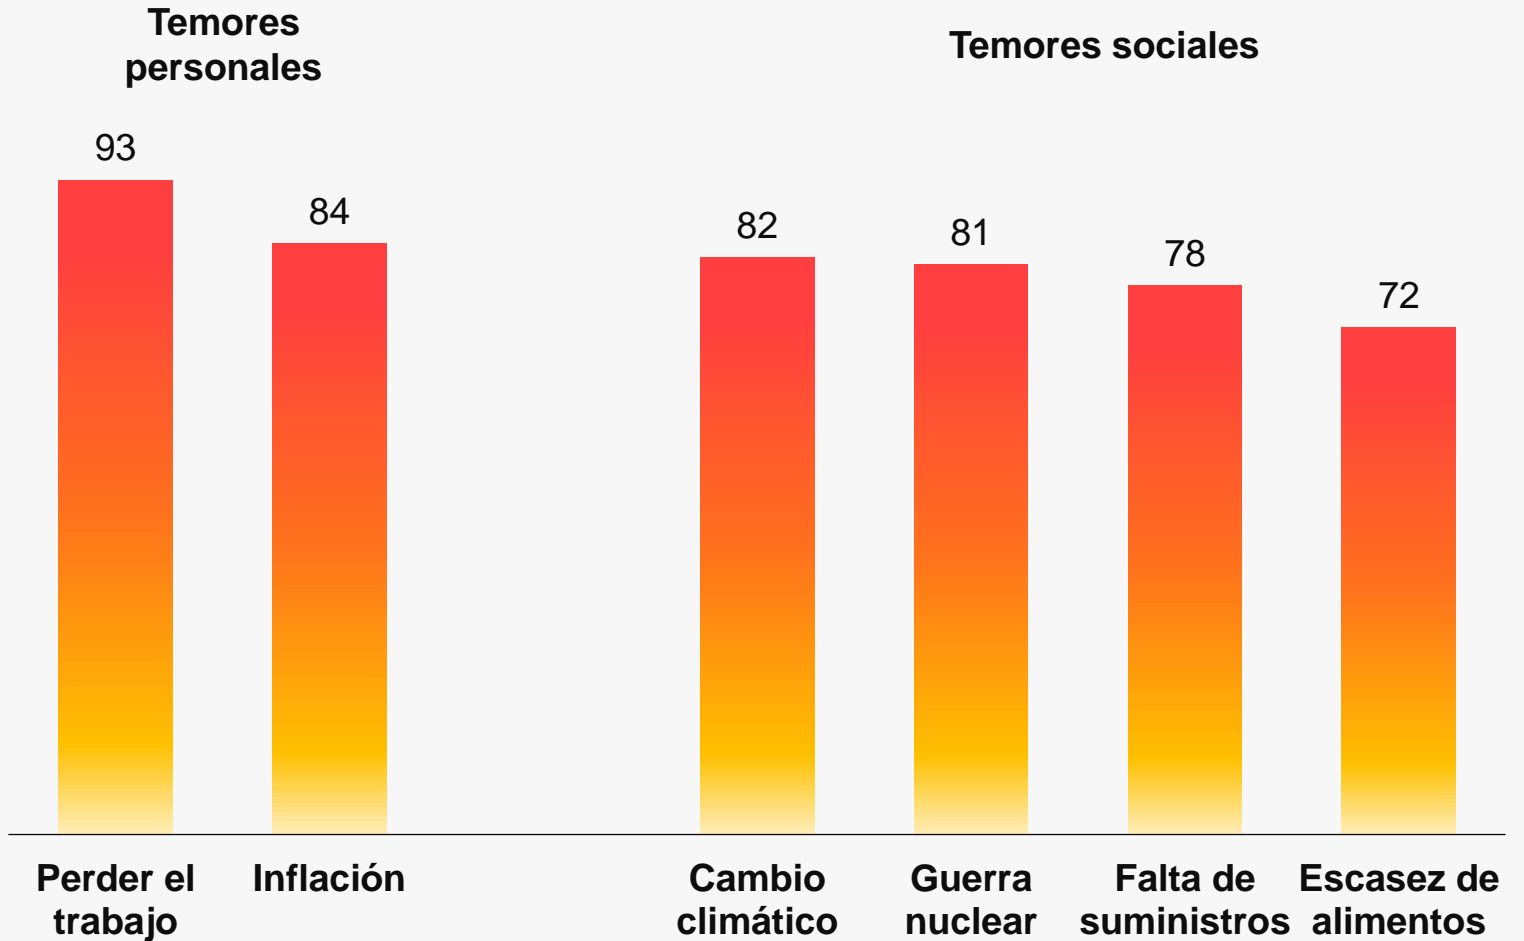

2023 Edelman Trust Barometer. CNG_FUT. Thinking about the economic prospects for yourself and your family, how do you think you and your family will be doing in five years' time? 5-point scale; top 2 box, better off. General population, 24-mkt avg. *Sweden is not included in the global average. Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Los temores son ahora más personales y más existenciales

Porcentaje que se preocupa por cada uno, en España

2023 Edelman Trust Barometer. POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? 9-point scale; top 4 box, worry. Some attributes asked of half of the sample. General population, Spain. Job loss asked of those who are an employee of an organization (Q43/1). Job loss is a net of attributes 1-3, 5, and 22-24.

Y ante esta situación, no se confía en que ninguna institución haga lo correcto

Porcentaje de confianza en España

○ Cambio significativo

Cambio de tendencia: desciende la confianza en todos los líderes institucionales

Porcentaje de confianza en España

2023 Edelman Trust Barometer. TRU_PEP. Below is a list of groups of people. For each one, please indicate how much you trust that group of people to do what is right. 9-point scale; top 4 box, trust. Some attributes asked of half of the sample. General population, Spain. "My coworkers" and "my CEO" only shown to those who are an employee of an organization (Q43/1). Year-over-year changes were tested for significance using a t-test set at the 99%+ confidence level.

Se mantiene la brecha de confianza en relación a la desigualdad económica en España

Índice de confianza

(porcentaje medio de confianza en ONGs, empresas, Gobierno y medios de comunicación)

2023 Edelman Trust Barometer. The Trust Index is the average percent trust in NGOs, business, government and media. TRU_INS. Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right. 9-point scale; top 4 box, trust. General population, 27-mkt avg., by income. *Sweden is not included in the global average.

Income quartiles were determined separately for each country based on the distribution of household incomes among respondents from that country.

Se demanda más compromiso social a las empresas, no menos

Porcentaje que afirma, en España

Al abordar cada una de estas **preocupaciones sociales**, las empresas están

No haciendo suficiente
 Se están excediendo

En España, se espera de los CEOs que velen por los trabajadores, el clima y la discriminación

Porcentaje que afirma, en España

Espero que los CEOs se posicionen públicamente sobre:

El trato a sus empleados

Cambio climático

Discriminación

Desigualdad económica

Inmigración

Mejorar el optimismo económico: invirtiendo en salarios justos, comunidades locales y la formación de aptitudes

Porcentaje que afirman, en España

Los CEOs están obligados a...

Pagar un sueldo justo

Garantizar que su comunidad sea segura
y próspera

Pagar impuestos corporativos justos

Formar a sus empleados

El compromiso social pone a las empresas en riesgo de estar politizadas

Porcentaje que afirma

Creo que las empresas **pueden evitar la politización** cuando abordan los asuntos sociales más controvertidos

Menos de la mayoría está de acuerdo (19 de 28 países)

La información de confianza aísla la acción empresarial de la politización

Entre el 41% que afirma que es posible que las empresas aborden los retos sociales sin ser percibidas como politizadas, porcentaje que afirman, en España

Para evitar ser percibidos como políticamente posicionadas al defender una postura:

No posicionarse con un único partido

Basar sus acciones en la ciencia

Convertirse en una fuente de información veraz

Vincular sus acciones a las demandas de sus empleados

Vincular sus acciones a las demandas de los consumidores

Los resultados sociales serían mejores si Gobierno y empresas trabajan en equipo

Porcentaje que afirma, en España

Utilizando el poder de la comunicación para crear una identidad compartida

Porcentaje que afirma

Si las marcas celebraran lo que nos une y pusieran de relieve el interés común, esto reforzaría el tejido social

GLOBAL 27

68%

2023 Edelman Trust Barometer. POL_SOL. How important do you feel each of the following would be to increasing civility among people in your country and strengthening the social fabric that binds people together? 6-point scale; top 3 box, help strengthen the social fabric. Attributes shown to half of the sample. General population, 27-mkt avg. *Sweden is not included in the global average.

Abriendo caminos en un mundo polarizado

1

Las empresas deben continuar liderando

Existe un mayor nivel de expectativas y responsabilidad sobre las empresas. Éstas deben informar el debate y aportar soluciones en materia de clima, diversidad e inclusión y formación profesional.

2

Colaborar con el Gobierno

Los mejores resultados se obtienen de un trabajo colaborativo entre Gobierno y empresas. Éstas deben construir consenso y colaborar en políticas y normas para conseguir resultados que nos acerquen a una sociedad más justa, segura y próspera.

3

Restaurar el optimismo económico

Esta perspectiva económica pesimista es causa y consecuencia de la polarización. Las empresas deben invertir en salarios justos, formación y comunidades locales para abordar la división de clases y el círculo vicioso de la polarización.

4

Promover la verdad

Las empresas tienen un rol esencial en el ecosistema de la información. Deben ser una fuente fiable, promover un discurso cívico y trabajar en contra de las fuentes de información falsas, invirtiendo en corregir sus mensajes, reinversión y otras acciones.

1. Because some of the content we ask is deemed politically sensitive there are several countries where we take special precautions in order to avoid putting our respondents, or ourselves, in a position to break any local laws. We work closely with our sample partner and its legal team to identify which questions, and in what countries, we should refrain from asking. The two countries where we removed questions and/or answer options were China and Thailand.

Data Analyses Explained:

How We Plotted Countries by Polarization Levels

To visualize country-level polarization, we plotted countries based on the percentage of respondents in each country who see deep divisions and feel those divisions are entrenched.

Depth of Division forms the y-axis. A country's Division score is the percent who believe their country is very/extremely divided, using **POL_DEG**.*

POL_DEG. Using the scale below, please indicate how divided on key societal issues you believe your country is today. 5-point scale; top 2 box = very/extremely divided.*

A country's Entrenchment score is on the x-axis. It's the percent who do not believe that their country will be able to work through its divisions, using **POL_PROG**. This score was measured *only among respondents who believe their country is very/extremely divided (POL_DEG/4-5)*.

POL_PROG. How likely or unlikely do you think it is that your country will be able to work through or overcome its ideological divisions and lack of agreement on key issues and challenges? 8-point scale; codes 2-5 = unlikely/neutral, among POL_DEG/4-5 = Entrenched

The table to the right shows each country's Division and Entrenchment score, as well as the total Polarization score. Cut-points were then determined that would allow us to group countries based their level of polarization. The first step in the cut-point determination process was to look for natural gaps in the scores. We then further tested these cut-points by profiling countries in each of the 4 resulting groupings to make sure that they displayed differences along key polarization-related dimensions. The final cut points used to characterize a country's level of Polarization is shown below.

- **Severely polarized:** sum of 130 or higher
- **In danger of severe polarization:** sum between 115 to 129
- **Moderately polarized:** sum between 80 to 114
- **Not polarized:** sum less than 80

Country	Division (y-axis)	Entrenchment (x-axis)	Polarization score (sum)	
Argentina	87	77	164	
Colombia	74	62	136	
U.S.	67	66	133	
Spain	56	77	133	
S. Africa	61	71	132	
Sweden	51	79	130	
Japan	47	75	122	
Italy	41	79	120	
Brazil	65	55	120	
UK	50	69	119	
The Netherlands	43	75	118	
France	51	66	117	
Mexico	52	65	117	
S. Korea	55	61	116	
Germany	41	75	116	
Australia	35	74	109	
Canada	38	71	109	
Thailand	48	50	98	
Nigeria	49	49	98	
Ireland	32	64	96	
Kenya	39	47	86	
India	35	36	71	
UAE	18	48	66	
Singapore	18	46	64	
Saudi Arabia	18	43	61	
China	14	45	59	
Malaysia	28	27	55	
Indonesia	11	44	55	

*Division score was calculated using a rebased POL_DEG excluding respondents who selected "don't know."

Data Analyses Explained:

How We Defined Polarization Groups

To measure perceptions of societal polarization, we asked two questions, shown at the right. First, we measured the degree of perceived division on key societal issues within each country. Then, among only those who reported their country is very or extremely divided, we measured respondents' belief that their country can work through. Based on their responses to these two questions, respondents were assigned to one of the three groups described here:

- **Not very divided (code 0):** respondents who say their country isn't very divided (POL_DEG/1-3).
- **Divided, not entrenched (code 1):** respondents who see their country as very or extremely divided (POL_DEG/4-5), but believe these divisions can be overcome or are not an issue (POL_PROG/1, 6-8).
- **Polarized: our divisions are entrenched (code 2):** respondents who see their country as very or extremely divided (POL_DEG/4-5), AND who also believe these divisions can not be overcome (POL_PROG/2-5).

These categories also defined a three-point polarization scale which was used as the outcome variable in a linear regression we used to identify the drivers of perceptions of polarization as detailed on the regression page.

Questions related to polarization

POL_DEG: Using the scale below, please indicate how divided on key societal issues you believe your country is today.

1. Not at all divided
2. A little divided
3. Somewhat divided
4. Very divided
5. Extremely divided
99. Don't know / Not sure

POL_PROG: How likely or unlikely do you think it is that your country will be able to work through or overcome its ideological divisions and lack of agreement on key issues and challenges?

1. Ideological divisions and a lack of agreement on key issues are not a problem in this country
2. It will **never happen**
3. Very unlikely
4. Unlikely
5. Neither likely nor unlikely
6. Likely
7. Very likely
8. It will **definitely happen**
99. Don't know / Not sure

2023 Edelman Trust Barometer Global Report

How We Calculated the Determinants of Polarization

We also wanted to know what leads to polarization. We found that distrust, identity, unfairness, and pessimism were significant drivers.

The factors depicted in the report are significant drivers of polarization as determined by a linear regression. Polarization refers to the 3-pt scale described on the polarization definition slide. The full model, depicted below, accounts for 17.71% of the observed variance in polarization scores.

$$\text{Polarization} = (0.2351) + (.3380)\text{DistrustInGovernment} + (.3068)\text{LackOfSharedIdentity} + (.2478)\text{Systemic unfairness} + (.1465)\text{EconomicPessimism} + (.1431)\text{SocietalFears} + (.1062)\text{DistrustInMedia}$$

The coefficient listed next to each factor indicates the increase in the polarization score associated with that factor being present, holding all other factors constant. This standardized value allowed us to rank the importance of each predictor variable and determine what factors drive polarization the most. All coefficients were significant at a $p < .001$ level.

Drivers	Coefficient
Distrust in government	.3380
Lack of shared identity	.3068
Systemic unfairness	.2478
Economic pessimism	.1465
Societal fears	.1431
Distrust in media	.1062
Constant	.2351

Drivers	Question text and scoring
Distrust in government	TRU_INS. [GOVERNMENT] Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right using a 9-point scale where one means that you “do not trust them at all” and nine means that you “trust them a great deal”. <i>9-point scale; bottom 4 box = distrust in government</i>
Lack of shared identity	SOC_FAB_STR. How true is each of the following statements regarding the current situation in your country? For each one, please rate how true you believe that statement is using a nine-point scale where one means it is “not at all true” and nine means it is “completely true”. <i>9-point scale; (r1,3,6,7), average score between 1-5 = lack of shared identity</i>
Systemic unfairness	POP_MDC. Below is a list of statements. For each one, please rate how true you believe that statement is using a nine-point scale where one means it is “not at all true” and nine means it is “completely true”. <i>9-point scale; (r2,3,18*,19*), average score of 6 or greater = systemic unfairness</i> <i>*reverse scored</i>
Economic pessimism	CNG_FUT. Thinking about the economic prospects for yourself and your family, how do you think you and your family will be doing in five years’ time? Select one response. <i>5-point scale, codes 4,5 = economic pessimism</i>
Societal fears	POP_EMO. Some people say they worry about many things while others say they have few concerns. We are interested in what you worry about. Specifically, how much do you worry about each of the following? Please indicate your answer using a nine-point scale where one means “I do not worry about this at all” and nine means “I am extremely worried about this”. <i>9-point scale; top 4 box at a majority of items (r14, 27, 43, 30, 31, 32, 33) = societal fears</i>
Distrust in media	TRU_INS. [MEDIA] Below is a list of institutions. For each one, please indicate how much you trust that institution to do what is right using a 9-point scale where one means that you “do not trust them at all” and nine means that you “trust them a great deal”. <i>9-point scale; bottom 4 box = distrust in media</i>

Data Analyses Explained:

How We Plotted the Institutional Competence and Ethics Scores

We define trust as the combination of competence and ethics. The report features a chart depicting how competent and ethical each of the institution are rated to be. Here's how we calculated each score.

The competence score (the x-axis of the plot): An institution's competence score is a net of the top 3 box (AGREE) minus the bottom 3 box (DISAGREE) responses to the question "To what extent do you agree with the following statement? *[INSTITUTION]* in general is good at *what it does*". The resulting net score was then subtracted by 50, which means that for an institution to qualify as competent, it would require a net difference of 51 points or more in its percentage of top 3-box ratings versus its bottom 3-box ratings. This ensures that an institution could not be considered competent unless there is a majority who rate it as such.

The net ethical score (the y-axis of the plot): The ethics dimension is defined by four separate items. For each item, a net score was calculated by taking the top 5 box percentage representing a positive ethical perception minus the bottom 5 box percentage representing a negative ethical perception. The y-axis value is an average across those 4 net scores. Scores higher than zero indicate an institution that is perceived as ethical.

Respondents were asked:

In thinking about why you do or do not trust *[INSTITUTION]*, please specify where you think they fall on the scale between the two opposing descriptions. *(Please use the slider to indicate where you think [INSTITUTION] falls between the two extreme end points of each scale.)*

Dimension	Ethical Perception	Unethical Perception
Purpose-Driven	Highly effective agents of positive change	Completely ineffective agents of positive change
Honest	Honest and fair	Corrupt and biased
Vision	Have a vision for the future that I believe in	Do not have a vision for the future that I believe in
Fairness	Serve the interests of everyone equally and fairly	Serve the interests of only certain groups of people

2023 Edelman Trust Barometer: Analyses

How We Calculated Belief-Driven Buyers

In the June 2022 Edelman Trust Barometer Special Report: The New Cascade of Influence, respondents were asked a series of questions regarding the role their values, opinions about social issues, and political beliefs played in their purchasing decisions. The Belief-Driven Buyer (BDB) scale was created by averaging respondents' answers to the seven 9-pt agree/disagree scale items, shown in the table to the right.

- Non-belief-driven buyers were those that scored between 1 – 4.99 on the BDB scale, meaning on average they disagreed with these statements.
- Respondents who scored between 5.00 – 9.00 on the BDB scale were classified as belief-driven buyers, meaning on average they saw themselves reflected at least to some extent in these statements

Respondents were asked:

Please indicate how much you agree or disagree with the following statements

1.	Even if a company makes the product that I like most, I will not buy it if I disagree with the company's stand on important social issues
2.	If a brand offers the best price on a product, I will buy it even if I disagree with the company's stand on controversial social or political issues
3.	I have bought a brand for the first time for the sole reason that I appreciated its position on a controversial societal or political issue
4.	I have stopped buying one brand and started buying another because I liked the politics of one more than the other
5.	I have strong opinions about many societal and political issues. The brands I choose to buy and not buy are one important way I express those opinions.
6.	I have stopped buying a brand solely because it remained silent on a controversial societal or political issue that I believed it had an obligation to publicly address
