# Methodology & definitions

## 1. Reference database

The Dealroom database of investments, which includes the most comprehensive and detailed record of operations in 2023, has been taken as a reference to facilitate the comparison process.

## 2. Curated data

The reference information has been crossed with other reference databases and the most complete information from other sources has been incorporated.

## 3. Type of instrument

Only investments made through equity or convertible debt have been taken into account, so most operations that include grants have been excluded.

## 4. Exclusion of exits

These operations usually promoted by large corporate groups have been excluded, as well as investment operations for large amounts in companies that are more in the Private Equity segment.

## 5. Location of the company

All investment operations in companies with headquarters or founded in the Community of Madrid are considered. The comparative analysis of exits in the main European Hubs has only taken into account companies with headquarters in the hub
